61h Comments:

#### 61h. Comments

Minor brick re-pointing and cast stone patching needed at select locations. Interior face of exterior wall at attic is deteriorated, particularly where existing window openings have been boarded up. Investigation/ destructive testing is recommended. Window openings should be infilled (toothed in) with solid masonry. Evidence of moisture/ humidity issues within stairwell. Recommend looking into ventilation/ dehumidification.

Accessibility

#### **ACCESSIBILITY**

101. Exterior Accessible Route (H)

People with disabilities should be able to arrive on site, approach the building, and enter as freely as everyone else. At least one route of travel should be safe and accessible for everyone, including people with disabilities. This route must include handicapped parking, curb cuts, ramps, and automatic door operators as necessary to enter the building.

This route must include handicapped parking, curb cuts, ramps, and automatic door operators as necessary to enter the building.					
Is there an accessible exterior route as specified above?					
✓ Yes □ No					
102. Interior Accessible Route, Access to Goods and Services, and Restroom Facilities (H)					
The layout of the building should allow people with disabilities to obtain materials or services and use the facilities without assistance. This should include access to general purpose and specialized classrooms, public assembly spaces (such as libraries, gymnasiums, auditoriums), nurse's office, main office, and restroom facilities. Services include drinking fountains, telephones, and other amenities.					
Is there an accessible interior route as specified above?					
☑ Yes					
□ No					
103. Additional Information on Accessibility					
If the building lacks accessible interior or exterior routes:					
103a. Cost of improvements needed to provide accessible exterior and interior routes as specified above \$:					
(No Response)					
103b. Comments:
